Tips - Install Etabs 2016 on a computer that is dedicated to Revit Structure 2015 is installed. If you do not have a dedicated computer, install Etabs 2016 on any free computer. Install Etabs 2016 on a separate computer from the Revit Structure 2015 installation. - Installation sequence is done in this order: Revit Structure 2015 (after installation), CSiXRevit (after installation), Etabs 2016 (after installation) - During installation of Etabs 2016, the dialog will ask the license type. Use "Standalone". Click Next to install the license. - After installing Etabs 2016: Click here for user's guide. - ETABS 2016 has two kinds of license: Standalone License and Revit Structure 2015. Standalone License cannot activate CSiXRevit on the same computer, and can activate only Standalone License on the same computer. Revit Structure 2015 can activate CSiXRevit on the same computer. On the other hand, if Standalone License is deactivated, Revit Structure 2015 can not be activated on the same computer. - During the installation process of Etabs 2016, if you receive error message: "Cannot activate Software license," it means that the ETABS license is not activated. To reinstall the license, do the following: - deactivate the ETABS 2016 license by clicking "DEACTIVATE LISENSE" at the bottom left, then confirm the deactivation by click "OK". - Go back to (Activation for "Standalone License"), then deactivate the license again by click "DEACTIVATE LISENSE" at the bottom left, then confirm the deactivation by click "OK". - Then, reactivate the license by click "ACTIVATE LISENSE" at the bottom left, and follow the onscreen instructions. - If you receive the message "Cannot activate license for "Standalone License", it means that the license does not have active status. To reactivate the license, do the following: - Click "DEACTIVATE LISENSE" to deactivate the license, and then click "OK" to confirm the deactivation. - Click "DEACTIVATE LISENSE" at the bottom 570a42141b
