Update: "Stay Awake" is a new radio companion app (OSX App Store, Palm OS). It deals with relaxing and sleeping in the best way possible and has a powerful effect on the player. It shows how to deal with stressful situations with your mind and relax, to the extent that your sleep will be deeper and more restful. The application has been carefully designed to control, with the help of micro-alarms and heartbeats, the quality of your sleep. During the day, a second screen informs you about your sleep. You can see how many minutes you're sleeping and stay up awake (less than 20% of time, period of four hours). You can also download an alarm clock or change the sleep time. This application helps relieve stress and end the stress-induced insomnia. A peculiar game. Note: it's also good for pregnancy. May disturb children. More details can be found here: >

As you can see, the game is coming. We will soon share a new video showcasing some of the first activities of the game, as well as the tabletop RPG video.

Thank you!
