Add to Favourites The game's name, Elden Ring, was determined to represent all of the Elden Ring (ELDRON-████), the "law" that young Elves complete at the end of their training. Except for removing the □EL□ character, Elden Ring also embodies the power Elden provides young Elves. The game's title is a curse, reflecting young Elves' wish to obtain power. In addition, at the end of their training, the training staff must take back the power they have taught and force Elden to take the place of the power Elden gave them, ideally in the form of a sacred magical Artifact.

TARNISHED CELINUS, Dedicated guardian of the elden ring (ELDRON-████) in Valhalla, IL. Celinus is actually the bearer of the SELLIST, and he was cursed to be the guardian in Valhalla, IL, the place of intermediate training for the Elden Ring, by a fellow ELDRON-████. But why is Celinus called "TARNISHED"? Celinus not only exchanges vows with Elden in the end of his training, but also accepts the power of the ELDRON-████ in exchange. He is driven into violent behavior if the power he grants is not given up in the end. "I dedicate my life

**The Lands Between - Majestia Clasícula (translated by Lambert, English) Developer: D3Publisher Publisher: 505 Release Date: 07/05/2018 OS: Windows (Playable on PC) Website: Purchase from Steam: Pics: Can be found here REVIEW** Long time no see, eh? Want to hear a story? Well, this is it. Me and Lambert have been b-a-r-r-ing about this for a while, we wished to make the best turn-based fantasy rpg we could, and we finally were given a chance to. Being able to make it was a dream come true for us, and we hope this one works out for everyone as well! Now, in regards to the gameplay mechanics, they're quite simple: - Each character can only move one square per turn, and can't move to the same square twice - All characters on the field of battle are automatically controlled by the computer, therefore all plans can be adjusted - Each character has his own HP and SP - Each character also has his own destiny line, with different effects. Killing a character for example will result in losing a large piece of stats, while filling a card with cards will add a specific stat to the current character - You can only use your skills once per turn. - You can switch characters and use skills up to three times a day. - Monsters are all generated randomly (some types are weaker than others) - The world map is full of experience points, and you level up by earning them - Each town has a different statistic growth rate for stats - Will you be able to lead this representative of the country to the highest position? In regards to the story, we decided to make this one as speculative as possible and it will all depend on your actions and decisions, so expect twists and turns... But what would this be, you might ask? Well the Lands Between, of course! Can you guess what the gods want? Support this project to be
