Q: How do I answer the user for telling how many guesses they have left? I have a puzzle game, and when the user has completed the game, I want to count how many guesses the user has left and tell the user. I want to do this based on the number of guesses the user has left. If the user has 1 guess left, then give them 1 point. If the user has 2 guesses left, then give them 2 points. This would work for how many guesses the user has left if the user has only 1 guess left. Here is the problem I am currently having. I am using C# and VS2008. I have the following code: private void button1_Click(object sender, EventArgs e) { DisplayGuess(); textBox1.Text = ""; if (numberOfGuesses == 100) { MessageBox.Show("Exiting Game.");
