Hastilude is a competitive and co-op action game for 1 to 4 players. Climb atop your horse and soar into battle using your wits, reflexes, and an array of weapons and special abilities against your opponents. Dismount your foes and swoop in for the score! Players can earn cash, titles, and experience points through every match as well as the ultimate prize, bragging rights! Each match has its own map, items, characters, and songs. The overall campaign allows you to play through a full 2-3 hour story while also being able to jump right into the multiplayer battle system. **COMPETE** Each player has a deck of three cards. A card is drawn at the start of a match, and can be played during that match, allowing the player to use a specific ability or skill. Each turn, players can perform actions, obtain and spend money, and engage in combat. Hastilude supports local 4-player co-op and 7-player online competition! **THE CAMPAIGN** The campaign gives players the chance to explore a vibrant and detailed fantasy world. Armed with your special abilities and items, you'll be challenged to complete various objectives. Campaign modes include: Hunt, Versus, Campaign, and Mission. Throughout the campaign, players earn points for combat, items, and title unlocks. **POSSIBLE TAG TEAM COMPETITION** Players can play solo or with a friend in online or local multiplayer. **POSSIBLE TEAM RELATIONSHIPS** You can form a team of up to 7 friends for co-op play. **CAMPAIGN** For the Campaign mode, players are tasked with completing quests in each area, earning a variety of items to equip in the Armory, collecting "keys", and engaging in battle. **NON-COMPETITIVE MODE** Those who don't want to compete can enjoy a non-competitive game mode. Players can hunt down 2, 4, or 7 AI enemies without players to face off against. **Multiplayer** Play multiplayer against AI opponents or against your friends in local, online, or both. The only limit is your imagination! **Game Features:** **CO-OP DEATHMATCHES** Hasta Del Muerte/Hasta Muerte (Deathmatch) **PRETTY MATCHES** Effortlessly customizable options for each battle, including: map, characters, items, weapons, and special abilities

### More. The Eternal Utopia Features Key:

- **Game version.** It's not just UI! There's a multitude of UI changes and additions that have been added by our development team. Currently, we're on the 1.4.6 build.
- **Replay Video** - Both single and group replays are saved to a single path in the game's documents directory. The path is determined using the game's own unique ID.
- **Music Player** - Built from scratch to allow high quality audio streaming that's more compatible with streaming audio services like Spotify or Pandora. It can even save playlists or add music and/or station presets to the playlist.
- **Lighting for Animations.** Lighting has been improved for the animations in game to make it easier to see objects in a 3D world. This includes objects that are not even on the screen.
- **Cinematic Mode.** Cinematic mode allows you to record anything going on in game. The clips are called cinematics and can be manually added to videos in the games file view. These features work great together with our tools, which allow you to edit video directly in-game.

- 
- **3D Wallpaper, Texture, Game Art, & Movie maker.** Grab any image, draw on it, change its dimensions, scale it, and save it to any image format. All these tools are available in real time. Our tools also allow you to create your own movies, drawing maps and much more. To create a movie, just open the file and it's ready to view. Now, you can make a movie of your favorite part of the game, while also viewing the playback from any part of the game.
  - **Geo-localization, Personal & Achievement Points.** Once the game gains some popularity, we want people to be able to see their progress at the location of their choice. Creating a map from each of the game's levels allows you to see your tracked progress in that map.
  - **More.** There's so much more to the game! Keep an eye on our project @ #realityhacker on Game-space, to see it all in development.
  - **Localization.** More languages are available now. Bilingual
